st in customer satisfaction by  
dividuals. Our specialty is  
their own schedule. With  
venient hotels, and dining

Your company has been selected to design a website for a catering business named **Carolyn's Creations**. You are now ready to add content to the home page and apply formatting options to improve the page's appearance, using Figure 43 as a guide.

1. Open the Carolyn's Creations website, then open the home page.
2. Edit the page title to read **Carolyn's Creations: Premier Gourmet Food Shop**.
3. Add the description **Carolyn's Creations is a full-service gourmet food shop. We offer cooking classes, take-out meals, and catering services. We also have a retail shop that stocks gourmet items and kitchen accessories.**
4. Add the keywords **Carolyn's Creations, gourmet, catering, cooking classes, kitchen accessories, take-out, Seven Falls, Virginia.**
5. Place the insertion point in front of the sentence in the second paragraph beginning "Give us a call" and type **We also have a pick-up window on the right side of the building for take-out orders.**
6. Add the following address below the second paragraph using line breaks after each line:  
**Carolyn's Creations**  
**496 Maple Avenue**  
**Seven Falls, Virginia 52404**  
**555-963-8271**
7. Enter another line break after the telephone number and type **Email**, add a space, then add an email

link using **Carolyn Kate** for the text and **carolyn@carolynscreations.com** for the email address.

8. Create links from each menu bar element to its corresponding web page.
9. Replace the date that follows the text "Last updated on" with a date object that will automatically update on save, then save your work.
10. Insert a horizontal rule between the menu bar and the Welcome heading.
11. Set the width of the horizontal rule to 400 pixels, then left-align the horizontal rule.
12. Save your work, view the completed page in your default browser, then test each link.
13. Close your browser.
14. Close all open pages.
